

# CORPORATE PRESENTATION

Building Momentum & Sustainable Growth

September 2024

# CORPORATE OVERVIEW

**\$6.1 Billion**

*Market Capitalization*

**\$7.1 Billion**

*Enterprise Value*

**169,500 boe/d**

*2024 Production Guidance*

**\$1.0 Billion**

*2024 Capital Investment*

**\$600 Million**

*2024 Free Funds Flow*

**\$0.0608 per Share**

*Monthly Dividend (\$0.73 annually)*

**\$1.0 Billion**

*Year End Net Debt*

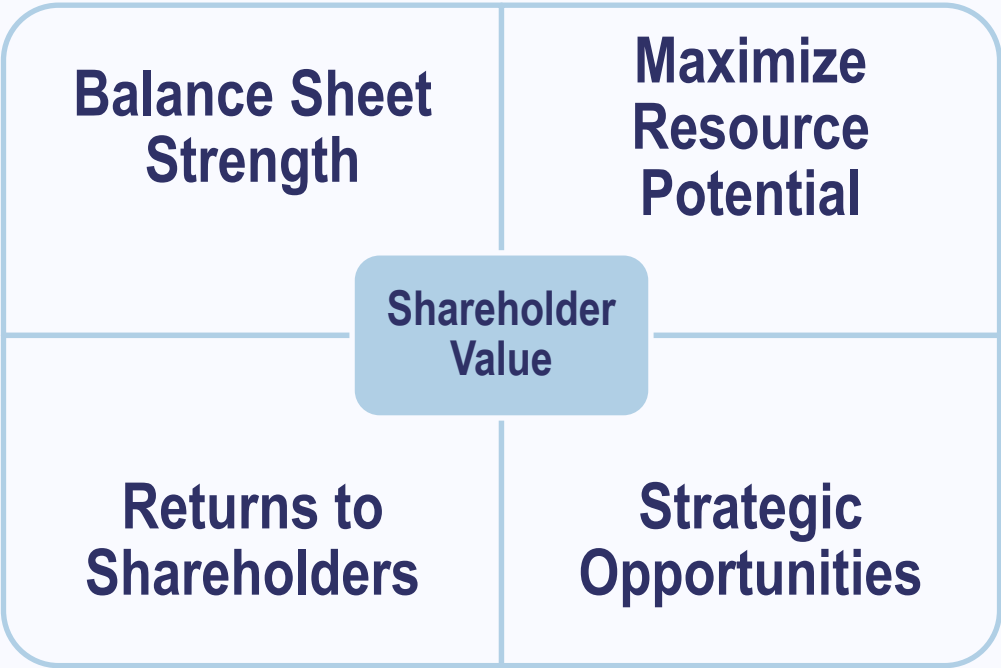

**0.6x**

*Debt/EBITDA*

# WHITECAP VALUE CREATION

**Low Debt / EBITDA ratio** with significant undrawn capacity

**Disciplined capital allocation** improving capital efficiency and profitability

**Sustainable dividends** enhanced through share repurchases

**Strengthens WCP** through financial and operational accretion in core areas

# FOCUSED ON PER SHARE RESULTS

**13% CAGR per share**

**Funds Flow**

**11% CAGR per share**

**Production**

**13% CAGR per share**

**TPP Reserves**

# DISCIPLINED RETURN OF CAPITAL TO SHAREHOLDERS

**26%**

Oct. 2023 dividend increase

**\$0.0608**

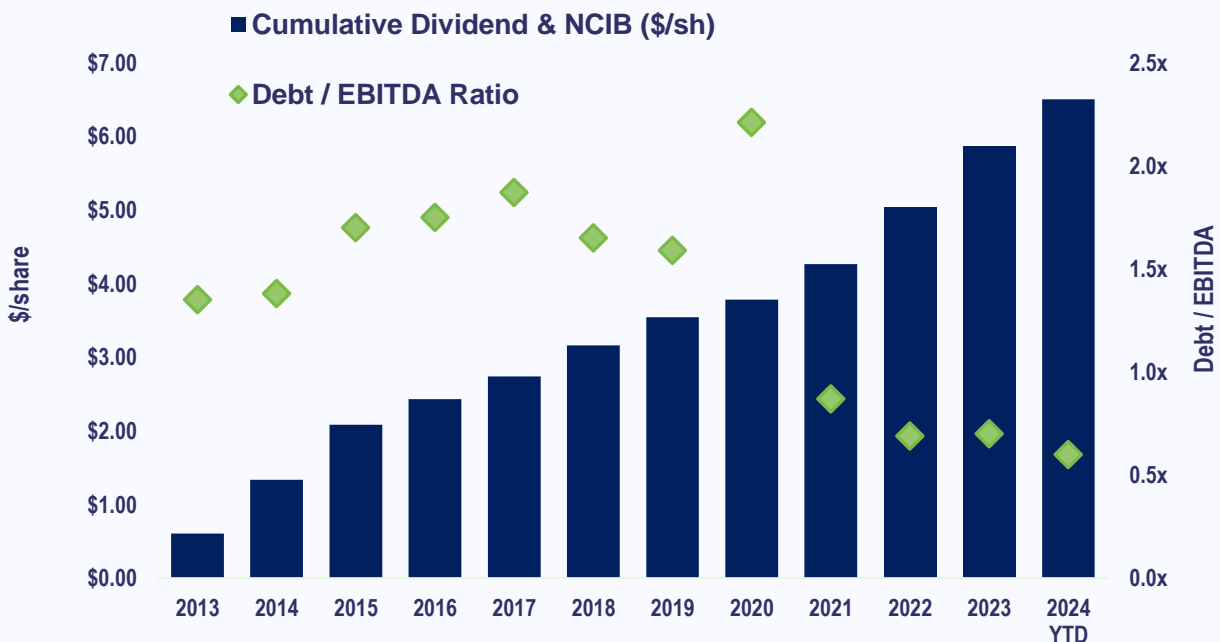

Current Monthly dividend

**\$706 million**

Share repurchases completed  
(as at Aug. 31, 2024)

**\$2.1 billion**

Total dividends paid  
(\$5.27/share) (at Aug. 31, 2024)

# PREMIUM ASSETS

# BALANCED PORTFOLIO REDUCES RISK AND MAXIMIZES RETURNS

## Montney/Duvernay

### ~15% Annual Growth

Area optionality supported by new infrastructure

### Liquids Rich Assets

High condensate production and pad drilling efficiencies resulting in top tier economics

### Greater Scale Increases Profitability

Significant growth on assets will lower cost structure and enhance future profitability

## Conventional

### ~20% Base Decline

Lowers our maintenance capital requirements

### High Netback Light Oil

Operating netback of ~\$40/boe driving strong profitability

### Infrastructure Availability

Reliable downstream accessibility through advantaged locations and firm transportation contracts

# TOTAL RESOURCE POTENTIAL

**6,442 (5,619 net)**

**Total Drilling Locations**

**2.5 million net acres**

**Including 700,000 acres of Montney & Duvernay Rights**

**550,000 boe/d**

**Long Term Production Potential**

# MONTNEY & DUVERNAY

## 700,000 ACRES

- Montney & Duvernay rights
- Second largest Alberta Montney acreage

## 2,462 LOCATIONS

- Highly economic Montney & Duvernay locations in inventory

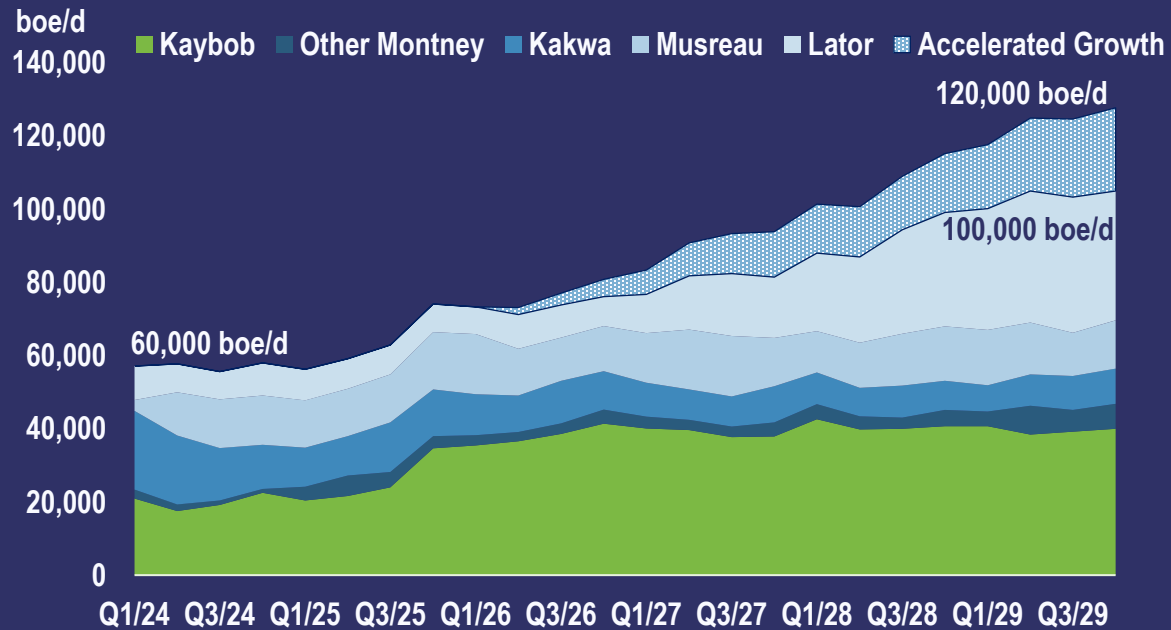

## 15% BOOKED

- Limited inventory booked
- Significant upside beyond TPP value

**MONTNEY ~40,000 BOE/d, 44% Liquids**  
**DUVERNAY ~20,000 BOE/d, 29% Liquids**

# SIGNIFICANT GROWTH POTENTIAL

- Near term growth focus at Kaybob, Kakwa and Musreau
- Medium term growth driven by Lator
- Option to accelerate growth in late 2026
- Long term growth driven by Resthaven

## WELLS DRILLED

# MONTNEY & DUVERNAY INVENTORY

Decades of Top Tier Inventory

5 Year Plan consumes <10% of Montney and Duvernay inventory

# A REPEATABLE, HIGH-QUALITY INVENTORY

		KAKWA	MUSREAU	LATOR	KAYBOB
<b>DCE&amp;T Costs</b>	(\$mm)	<b>\$11.20</b>	<b>\$11.20</b>	<b>\$11.20</b>	<b>\$12.30</b>

Assumptions: US \$75/bbl WTI, \$3.00/GJ AECO, 1.37 USD/CAD

# OUTPERFORMANCE ACROSS ALL AREAS

Unconventional Montney  
and Duvernay drilling  
programs yielding strong  
results relative to  
expectations

# LATOR – AN ORGANIC GROWTH STORY COMING IN 2026

**300 – 450**

Inventory locations to  
backstop growth profile

**>25 years**

Of stay-flat inventory at  
Phase 1 capacity

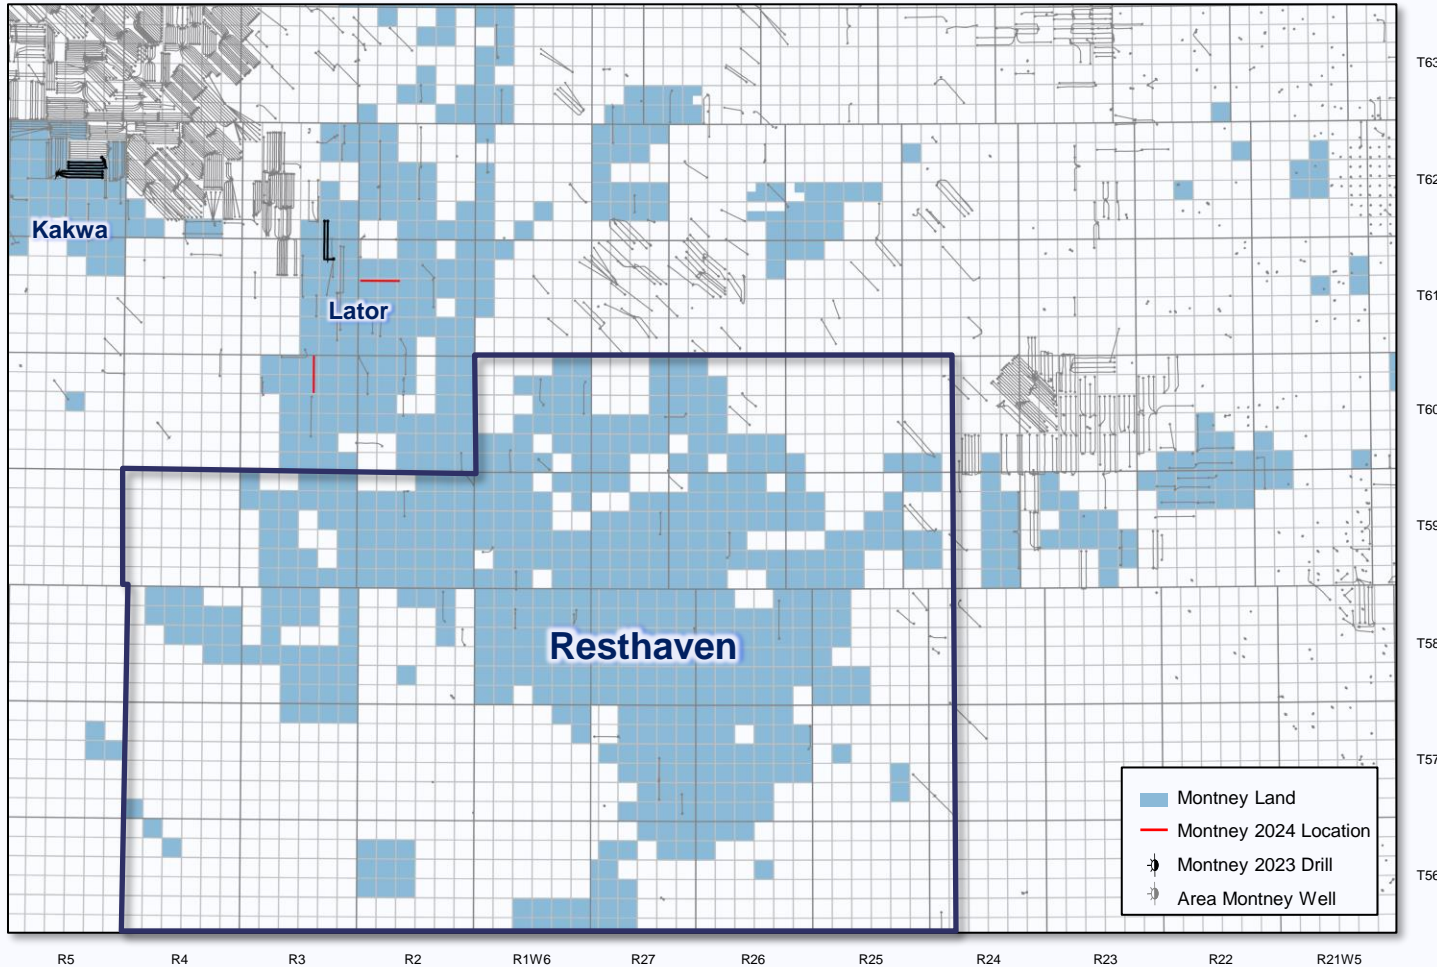

**85,000 boe/d**

Ability to increase overall  
facility throughput with  
second train, bringing area  
capacity to ~85,000 boe/d

## LATOR DEVELOPMENT PROFILE

# RESTHAVEN MONTNEY

**~1,000 Locations**

Identified across >300,000 acres of prolific, high-deliverability gas-weighted lands

**>1.2 billion BOE of recoverable volumes**

Equivalent to 2023 Year-End Corporate TPP Reserves

**Technical and economic evaluation underway**

Capture efficiencies and optimization from development on current focus areas to enhance economic returns

# STRATEGIC INFRASTRUCTURE

Established Partnership with Pembina Gas Infrastructure to fund future strategic projects

Whitecap operated to control cost and operations

FACILITY	CAPACITY	COST	TIMING
<b>Kaybob 15-07</b> <i>(50% owned by PGI)</i>	<i>36,500 boe/d</i> <i>(32% liquids)</i>		<i>In service</i>
<b>Musreau 05-09</b> <i>(50% owned by Topaz)</i>	<i>20,000 boe/d</i> <i>(65% liquids)</i>		<i>In service</i>
<b>Lator Phase 1</b>	<i>35,000 – 40,000 boe/d</i> <i>(40 – 50% liquids)</i>	<b>\$250 – \$300 million</b> <b>Funded by PGI</b>	Late 2026/ Early 2027
<b>Lator Phase 2</b>	<i>30,000 – 50,000 boe/d</i> <i>(30 – 35% liquids)</i>	\$150 – \$300 million	2029+

# PARTIAL INFRASTRUCTURE MONETIZATION

## Musreau Facility & Kaybob Complex

- 50% working interest disposed for **\$520 million proceeds**

Strategic Partnership with PGI creates **\$190 million in operational and financial synergies**

## PGI funds \$250 – \$300 million Lator Facility

- Whitecap to design, construct and operate

**Total value creation of ~\$1 Billion**

Enhanced processing, transportation, fractionation and marketing fees from PGI strategic partnership and lower interest expense result in minimal funds flow impact

TRANSACTION METRICS		
	(\$ MM)	(\$/boe)

Avg. 2025-2029 Funds Flow Impact	\$0	\$0.00

## CONVENTIONAL OVERVIEW

Foundation that supports  
long term sustainability

**ALBERTA ~50,000 BOE/d, 60% Liquids**  
Cardium / Charlie Lake / Glauconite

**SASKATCHEWAN ~60,000 BOE/d, 94% Liquids**  
Frobisher / Shaunavon / Viking / Weyburn CO<sub>2</sub> Project

**Low Decline & High  
Netback Light Oil  
Assets**

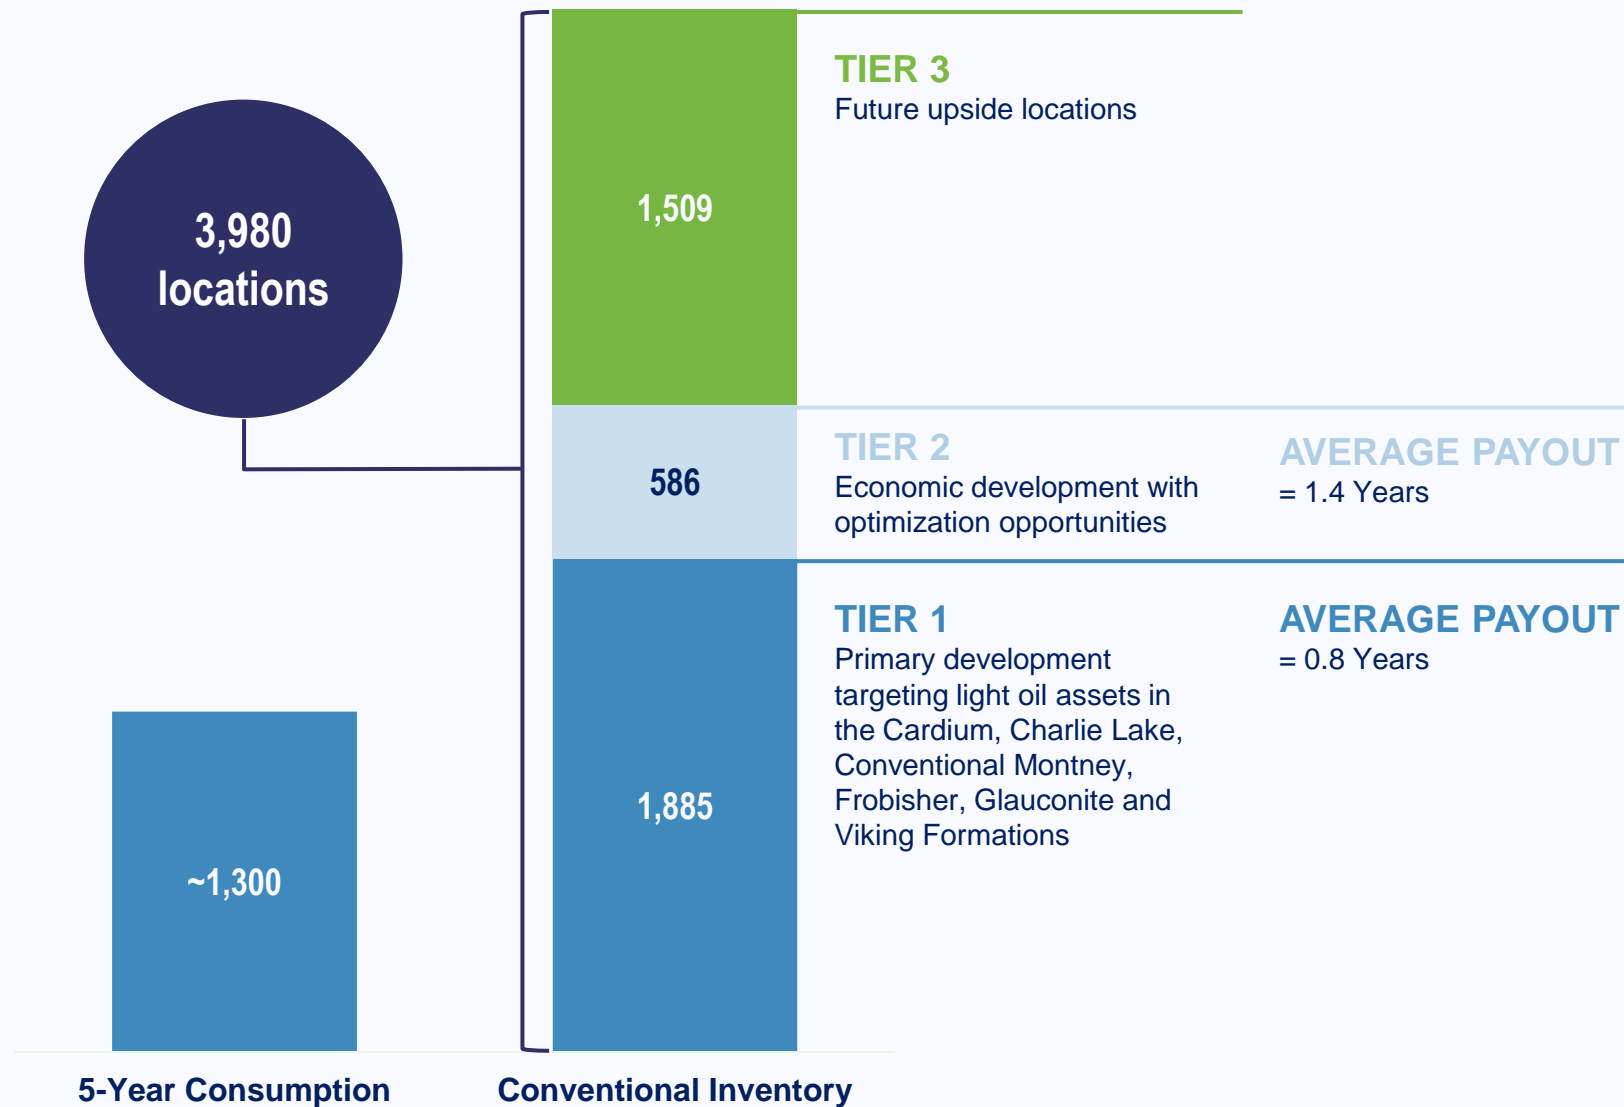

**Significant Free Cash  
Flow Generation**

**History of Strong  
Execution and  
Optimization of  
Acquired Assets**

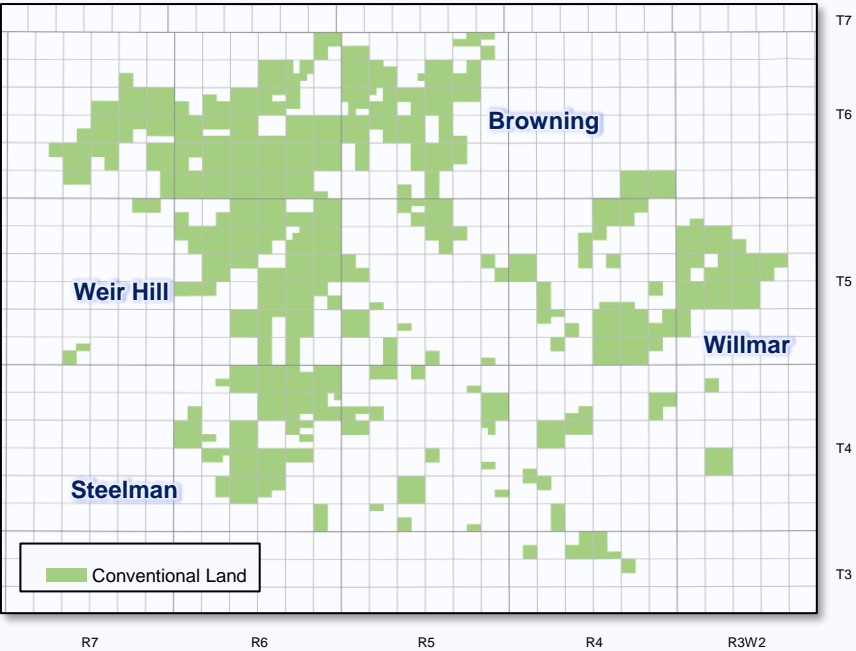

# CONVENTIONAL INVENTORY

Well defined and derisked inventory with optimization upside

5 Year Plan consumes  
< 33% of Inventory

# FROBISHER

TYPE CURVE PROGRESSION (2021 - 2024)

**2.2x**

Average lateral  
length increase

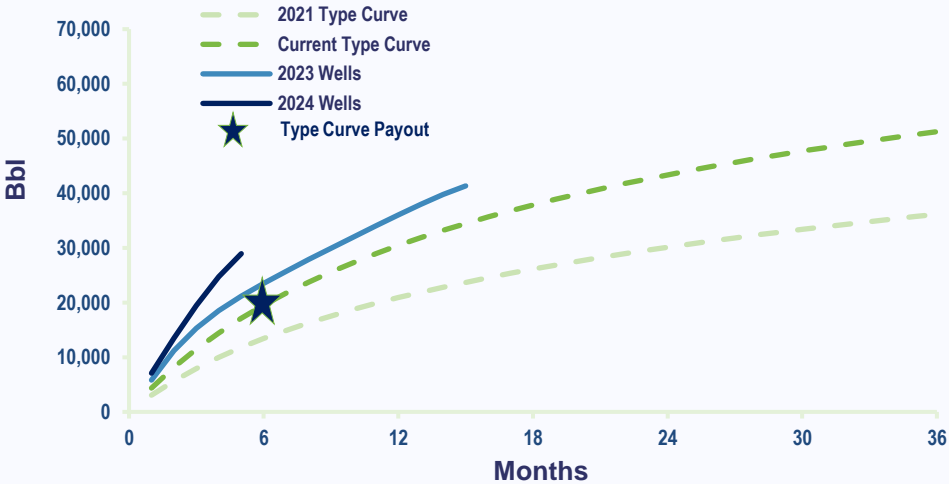

**45%**

Improvement in  
Production (IP90)

**26%**

Improvement in IP365  
Capital Efficiency

## CONTINUOUS IMPROVEMENTS

# 2024 BUDGET

# 2024 RETURN OF CAPITAL

## 2024 Budget

### Production (9% per share)

- 167,000 – 172,000 boe/d

### Capital Expenditures

- \$900 million – \$1.1 billion

## Financial Highlights

### \$1.6 billion of Funds Flow

- \$2.64 per share

### Fully Funded

- Base dividend and maintenance capital

# BALANCED CAPITAL ALLOCATION STRATEGY

## Montney and Duvernay

- **Budget Allocation:** ~\$450 million
  - 35% – 40% condensate and liquids
  - Consistent two rig program
  - Incl. \$115 million infrastructure projects
    - Musreau Battery (20,000 boe/d – onstream mid-March)
    - Kaybob Gathering Line
    - Pre-Engineering for Lator
      - (Positive FID June 2024)
- **Operations Focus: 33 (31.5 net) Wells**
  - Uncon. Montney (Musreau & Lator)
  - Duvernay (Kaybob)

## Conventional

- **Budget Allocation:** ~\$550 million
  - 75% – 80% oil and liquids
  - Incl. \$130 million for secondary/tertiary recovery
    - Weyburn CO<sub>2</sub>
    - Southwestern Sask
    - Viking
    - West Pembina
- **Operations Focus: 204 (182.6 net) Wells**
  - Cardium & Glauconite (Central AB, Wapiti)
  - Lower Shaunavon (SW SK)
  - Viking (West Sask)
  - Frobisher & Weyburn CO<sub>2</sub> (East SK)

# 5 YEAR PLAN

## 5 YEAR PLAN

5% Average Annual Growth  
Rate to 215,000 boe/d

\$10 Billion Funds Flow

\$6 Billion Capital Investment

\$4 Billion Free Funds Flow

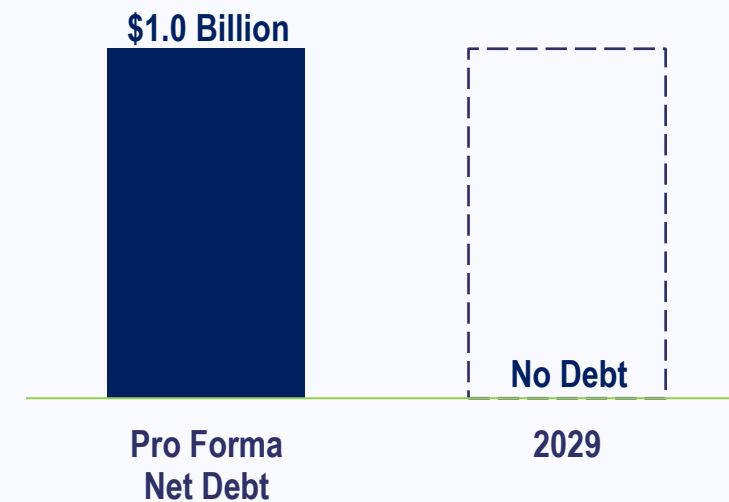

**No Debt in 2029**

### FREE FUNDS FLOW

### NET DEBT

# 5 YEAR FREE FUNDS FLOW PROFILE

**\$4 Billion** of Free Funds Flow

**\$3 Billion** of Returns to Shareholders

**\$1 Billion** of Debt Repayment

# UPSIDE POTENTIAL TO THE 5 YEAR PLAN

Over \$800 million in incremental free funds flow

## CAPITAL EFFICIENCY IMPROVEMENTS

- Well Design (spacing, benching, lateral lengths, etc.)
- Development Optimization
- Focus on cost control & efficient planning

## OPERATING COST REDUCTIONS

- Utilizing technological advancements
- Focus on cost control and take advantage of scale

# NATURAL GAS OPTIONALITY

Timing capital projects into long-term takeaway capacity

Significant future cash flow upside

# FINANCIAL PRIORITIES

# BALANCE SHEET STRENGTH

Top Tier balance sheet with **low Debt/EBITDA ratios** and significant liquidity

Net debt of \$1.0 Billion at year end (0.6x Debt/EBITDA)

Well below credit facility covenants of  
 Debt/EBITDA < 4.0x,  
 EBITDA/Interest > 3.5x and  
 Debt to Capitalization < 60%

# RISK MANAGEMENT

Downside  
protection to  
support dividend  
and maintenance  
production

Oil hedges	2H/24	2025	2026
<b><i>Production hedged</i></b>	<b>17%</b>	<b>28%</b>	<b>6%</b>
Swaps hedged (bbl/d)	9,000	23,471	5,000
Average swap price (C\$/B)	\$106.20	\$102.17	\$94.77
Collars hedged (bbl/d)	5,000	-	-
Average collar price (C\$/B)	\$82.00 x \$116.98	-	-

Natural gas hedges	2H/24	2025	2026
<b><i>Production hedged</i></b>	<b>17%</b>	<b>28%</b>	<b>7%</b>
Swaps hedged (GJ/d)	57,027	107,466	30,000
Average swap price (C\$/GJ)	\$3.01	\$3.35	\$3.58
Collars hedged (GJ/d)	-	-	-
Average collar price (C\$/GJ)	-	-	-

# CRUDE OIL MARKETING

## HIGH NETBACK

Majority light oil pricing drives strong operating netbacks of \$40/boe

## PIPELINE ACCESS

Our advantaged locations and firm service agreements ensure reliable pipeline egress for our entire production portfolio

## TRANSMOUNTAIN EXPANSION

Additional pipeline egress out of the basin has improved differentials on all grades of crude oil

## CRUDE OIL FINANCIAL EXPOSURE

# NATURAL GAS AND NGL MARKETING

## MARKET ACCESS

Established term transportation agreements and leveraged dual-connected facilities

## DIVERSIFICATION

Future focus on price diversification across North America and globally through LNG exposure

## GLOBAL LNG

Partnered in the 1.7 Bcf/d Ksi Lisims LNG project

## NGL FRACTIONATION

Fractionation secured for our 5+ year growth plans in a bottlenecked market

## NATURAL GAS FINANCIAL EXPOSURE

# SUSTAINABILITY

CARBON CAPTURE,  
UTILIZATION, &  
STORAGE EXPERTISE

Leader in CO<sub>2</sub>  
Sequestration

We safely store  
~2 MT/year

Weyburn Project	
To date	41 MT
Annual Rate	~2 MT/year
Total Storage Capacity	115 MT
Remaining Injection Life	35+ Years

Future Projects

Carbon Hub	Sequestration Opportunity
Saskatchewan	~4 MT/year
Lamont	~3 MT/year
Rolling Hills	~3 MT/year
Central Alberta	~1.5 MT/year
Total	~11.5 MT/year

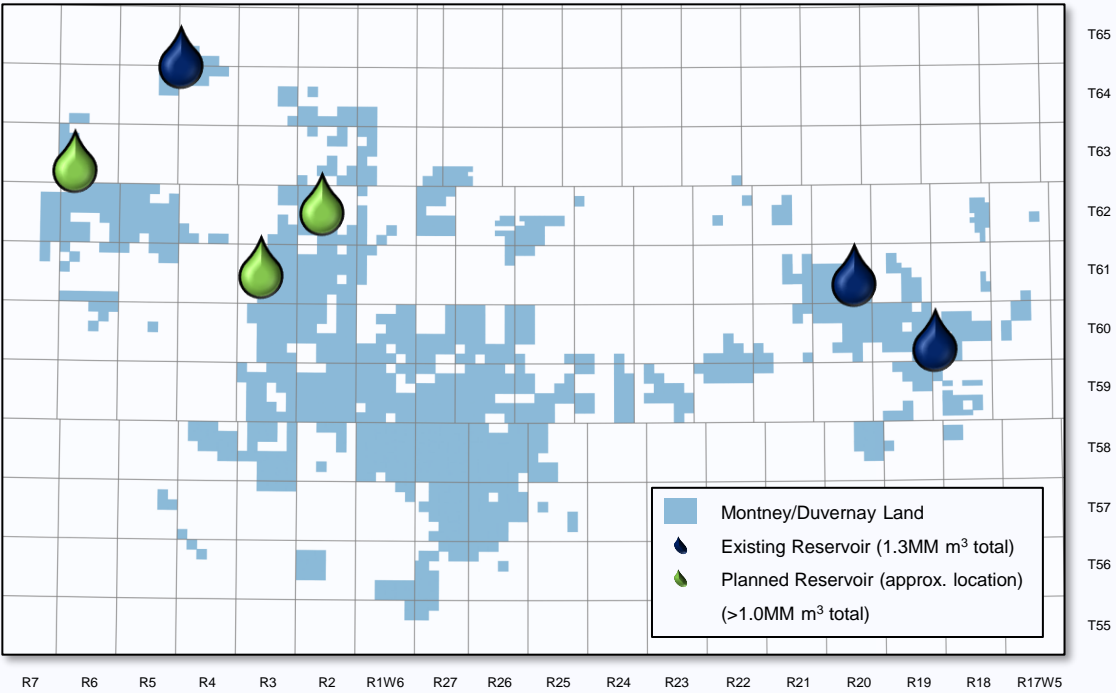

# REDUCING OUR WATER USAGE AND SECURING AVAILABILITY

MONTNEY AND DUVERNAY WATER INTENSITY (m³/tonne)

**-22%**  
Duvernay Water Usage vs pre-2021

**-42%**  
Montney Water Usage vs pre-2021

## LEADERS IN SUSTAINABILITY

### Environment

**29%**  
**Reduction** in  
Corporate Scope 1 &  
2 GHG Emissions in  
past 5 years

---

**65%**  
**Reduction** in  
Methane Emissions  
in past 5 years

# SLIDE NOTES

## Slide 2

1. Market capitalization calculated based on current shares outstanding as at August 31, 2024, and 7.6 million share awards outstanding.
2. Market Capitalization and Enterprise value are supplementary financial measures. See Specified Financial Measures in the Advisories.
3. Enterprise value calculated based on fully diluted common shares outstanding as at August 31, 2024, a share price of \$10.25 and year end net debt of \$1 billion.
4. Net debt is a capital management measure. See Specified Financial Measures in the Advisories.
5. The debt used in the Debt to EBITDA calculation includes bank indebtedness, letters of credit, and dividends declared in accordance with the Company's credit agreements.
6. The EBITDA used in the Debt to EBITDA calculation is adjusted for non-cash items, transaction costs and extraordinary and non-recurring items such as material acquisitions or dispositions in accordance with the Company's credit agreements.
7. Copies of the Company's credit agreements may be accessed through the SEDAR+ website ([www.sedarplus.ca](http://www.sedarplus.ca)).
8. Expenditures on property, plant and equipment also referred to as "Capital Expenditures" or "Capital Spending" or "Capital Investments" or "Development Capital".
9. See *Oil and Gas Advisory* in the Advisories for additional information on production.
10. Free funds flow is a non-GAAP financial measure. See Specified Financial Measures in the Advisories.
11. Free funds flow is based on actual prices January-August and US\$70/bbl WTI, \$0.74 USD/CAD, and \$1.65/GJ for the balance of 2024.

## Slide 3

1. The debt used in the Debt to EBITDA calculation includes bank indebtedness, letters of credit, and dividends declared in accordance with the Company's credit agreements.
2. The EBITDA used in the Debt to EBITDA calculation is adjusted for non-cash items, transaction costs and extraordinary and non-recurring items such as material acquisitions or dispositions in accordance with the Company's credit agreements.
3. Copies of the Company's credit agreements may be accessed through the SEDAR+ website ([www.sedarplus.ca](http://www.sedarplus.ca)).

## Slide 4

1. Funds flow is a capital management measure. See Specified Financial Measures in the Advisories.
2. See *Oil and Gas Advisory* in the Advisories for additional information on production.
3. Reserves for 2010-2023 are based on McDaniel & Associates Consultants Ltd.'s ("McDaniel") reserves evaluation reports effective December 31 of the respective year in accordance with NI 51-101 and the COGE Handbook.
4. For production and TPP reserves, the constituent product types and their respective quantities may be found in the Annual Information Form for the respective year, copies of which may be accessed through the SEDAR website ([www.sedar.com](http://www.sedar.com)).
5. CAGR is the compound annual growth rate representing the measure of annual growth over multiple time periods.

## Slide 5

1. NCIB refers to our normal course issuer bid.
2. The debt used in the Debt to EBITDA calculation includes bank indebtedness, letters of credit, and dividends declared in accordance with the Company's credit agreements.

## Slide 5 (continued)

3. The EBITDA used in the Debt to EBITDA calculation is adjusted for non-cash items, transaction costs and extraordinary and non-recurring items such as material acquisitions or dispositions in accordance with the Company's credit agreements.
4. Copies of the Company's credit agreements may be accessed through the SEDAR+ website ([www.sedarplus.ca](http://www.sedarplus.ca)).

## Slide 7

1. "Operating Netback" is a non-GAAP financial measure. See Specified Financial Measures in the Advisories.

## Slide 8

1. Production forecasts are calculated using the first year (IP365) production additions of each identified drilling location (booked and unbooked), a 5% corporate growth rate and a corporate decline rate of 24% increasing to 32%.
2. Potential upside represents prospective drilling locations contingent on the success of current and upcoming pilot projects. These drilling locations are not yet included in our Total Inventory.
3. See *Oil and Gas Advisory* in the Advisories for additional information on production and drilling locations.

## Slide 9

1. Gross locations depicted.
2. See *Oil and Gas Advisory* in the Advisories for additional information on production and drilling locations.

## Slide 10

1. See *Oil and Gas Advisory* in the Advisories for additional information on production and drilling locations.

## Slide 11

1. Gross locations depicted.
2. See *Oil and Gas Advisory* in the Advisories for additional information on drilling locations.
3. Tier 1 is defined as 1.2 year payout and less. Tier 2 is defined as 1.2 - 1.5 year payout.

## Slide 12

1. See *Oil and Gas Advisory* in the Advisories for additional information on NPV, payout, production, profit to investment, and reserves.
2. "Operating Netback" is also referred to as "Operating Income". "Operating Netback" is a non-GAAP financial measure. See Specified Financial Measures in the Advisories.

## Slide 13

1. See *Oil and Gas Advisory* in the Advisories for additional information on production.

## Slide 14

1. See *Oil and Gas Advisory* in the Advisories for additional information on production and drilling locations.

# SLIDE NOTES

## Slide 15

1. See *Oil and Gas Advisory* in the Advisories for additional information on drilling locations.
2. Recoverable volume based on internal estimates.

## Slide 17

1. EBITDA is a non-GAAP financial measure. See Specified Financial Measures in the Advisories.
2. Funds flow is a capital management measure. See Specified Financial Measures in the Advisories.
3. Operational and financial synergies based on future values discounted using a 10% discount rate.
4. EBITDA impact reflects working interest dispositions and synergies from the PGI partnership.
5. Funds flow impact includes working interest dispositions, synergies from the PGI partnership and interest/tax adjustments.
6. Per boe figures are supplementary financial measures. See Specified Financial Measures in the Advisories.
7. Per boe figures are based on 178,000 boe/d for 2025 and 195,000 boe/d for average 2025-2029.
8. 2025-2029 commodity prices of US\$75/bbl WTI, \$3/GJ AECO, \$1.37 USD/CAD.

## Slide 18

1. "Free Funds Flow" is also referred to as "Free Cash Flow". Free funds flow is a non-GAAP financial measure. See Specified Financial Measures in the Advisories.

## Slide 19

1. Gross locations depicted.
2. See *Oil and Gas Advisory* in the Advisories for additional information on drilling locations and payout.
3. Tier 1 is defined as 1.2 year payout and less. Tier 2 is defined as 1.2 - 1.5 year payout.

## Slide 20-22

1. See *Oil and Gas Advisory* in the Advisories for additional information on payout, production, profit to investment, NPV and reserves.

## Slide 24

1. Funds flow is a capital management measure. See Specified Financial Measures in the Advisories.
2. Expenditures on property, plant and equipment also referred to as "Capital Expenditures" or "Capital Spending" or "Capital Investments".
3. Production per share is calculated based on the weighted average diluted shares outstanding in the period.
4. See *Oil and Gas Advisory* in the Advisories for additional information on production.

## Slide 27

1. Funds flow is based on US\$75/bbl WTI and \$3.00/GJ AECO.
2. Funds flow is a capital management measure. See Specified Financial Measures in the Advisories.
3. Free funds flow is a non-GAAP financial measure. See Specified Financial Measures in the Advisories.

## Slide 27 (continued)

4. Expenditures on property, plant and equipment also referred to as "Capital Expenditures" or "Capital Spending" or "Capital Investments" or "Development Capital".
5. See *Oil and Gas Advisory* in the Advisories for additional information on production.
6. The debt used in the Debt to EBITDA calculation includes bank indebtedness, letters of credit, and dividends declared in accordance with the Company's credit agreements.
7. The EBITDA used in the Debt to EBITDA calculation is adjusted for non-cash items, transaction costs and extraordinary and non-recurring items such as material acquisitions or dispositions in accordance with the Company's credit agreements.
8. Copies of the Company's credit agreements may be accessed through the SEDAR+ website ([www.sedarplus.ca](http://www.sedarplus.ca)).

## Slide 28

1. Free funds flow is a non-GAAP financial measure. See Specified Financial Measures in the Advisories.

## Slide 29

1. Free funds flow is a non-GAAP financial measure. See Specified Financial Measures in the Advisories.

## Slide 30

1. See *Oil and Gas Advisory* in the Advisories for additional information on production.

## Slide 32

1. Net debt is a capital management measure. See Specified Financial Measures in the Advisories.
2. Net debt assumes \$200 million share repurchases in 2H/2024.
3. The debt used in the Debt to EBITDA calculation and Debt to Capitalization calculation includes bank indebtedness, letters of credit, and dividends declared in accordance with the Company's credit agreements.
4. The EBITDA used in the Debt to EBITDA calculation is adjusted for non-cash items, transaction costs and extraordinary and non-recurring items such as material acquisitions or dispositions in accordance with the Company's credit agreements.
5. Copies of the Company's credit agreements may be accessed through the SEDAR+ website ([www.sedarplus.ca](http://www.sedarplus.ca)).
6. Fixed rate debt includes interest rate swap contracts applied to bank debt.

# SLIDE NOTES

## Slide 33

1. Hedge positions current to September 18, 2024.

### Note

(i) Prices reported are the weighted average prices for the period.

Percent of net royalty volumes hedged are based on Whitecap production of 169,500 boe/d for 2024 and 177,000 boe/d for 2025.

2. Full hedge positions by product are:

WTI Crude Oil	Term	Volume (bbls/d)	Bought Put Price (C\$/bbl) <sup>(i)</sup>	Sold Call Price (C\$/bbl) <sup>(i)</sup>	Swap Price (C\$/bbl) <sup>(i)</sup>
Collar	2024 Jul – Dec	5,000	82.00	116.98	
Swap	2024 Jul – Dec	9,000			106.20
Swap	2025 Jan – Jun	8,000			104.39
Swap	2025 Jan – Dec	19,000			101.77

Swap	2025 Jan – Dec	105,000			3.34
Swap	2026 Jan – Dec	30,000			3.58

## Slide 34

1. "Operating Netback per boe" is a non-GAAP financial measure. See Specified Financial Measures in the Advisories.
2. Forecasted current operating netback provided.
3. Crude oil financial exposure based on forecasted volumes.

## Slide 35

1. Natural gas financial exposure based on forecasted volumes.

## Slide 37

1. CO<sub>2</sub> emissions and storage are based on gross operated numbers. Whitecap has a 65.3% operated working interest in the Weyburn Unit, 100% working interest in the Saskatchewan Carbon Hub, 20% working interest in the Lamont Hub, and 50% working interest in each of the Rolling Hills and Central Alberta Hubs.
2. Potential capacity includes unit extensions at Weyburn that may or may not be currently owned.
3. The identified sequestration opportunity at each of the future carbon hubs is based on reported emissions data from counterparties that Whitecap or its partners have had direct contact with (including having signed MOUs) regarding future sequestration opportunities. Whitecap provides no assurance that the total emissions values will be captured by each counterparty or they will be sequestered through a Whitecap owned carbon hub.

## Slide 38

1. Water intensity is defined as the total water pumped, divided by the total proppant pumped per well.
2. Includes prior operators.

# ADVISORIES

## Special Note Regarding Forward-Looking Statements and Forward-Looking Information

This presentation contains forward-looking statements and forward-looking information within the meaning of applicable securities laws relating to the Company's plans and other aspects of our anticipated future operations, management focus, strategies, financial, operating and production results and business opportunities. Forward-looking information typically uses words such as "anticipate", "believe", "continue", "trend", "sustain", "project", "expect", "forecast", "budget", "goal", "guidance", "plan", "objective", "strategy", "target", "intend", "estimate", "potential", or similar words suggesting future outcomes, statements that actions, events or conditions "may", "would", "could" or "will" be taken or occur in the future, including statements about our strategy, plans, focus, objectives, priorities, position. In particular, and without limiting the generality of the foregoing, this presentation contains forward-looking information with respect to: our 2024 production, capital, funds flow and free funds flow guidance; our belief that high condensate production and pad drilling efficiencies will result in top tier economics; our belief that significant growth on our Montney/Duvernay assets will lower our cost structure and enhance future profitability; our belief that a ~20% base decline will lower our maintenance capital requirements; our forecast for 5 year, 10 year, total inventory and potential upside production potential; the areas of focus over the near, medium and long term; our belief that we have the option to accelerate our growth in late 2026; our forecast for the impact that the partial infrastructure monetization will have on our 2025 and 2025-2029 EBITDA and funds flow; our forecast for after tax proceeds of the partial infrastructure monetization; that enhanced processing, transportation, fractionation and marketing fees from PGI strategic partnership and lower interest expense result in minimal funds flow impact; that a low base decline and long reserve life equates to significant free funds flow generation; our belief that we have significant inventory in the Montney & Duvernay beyond what is booked in reserves that will enhance long-term profitability; our total forecast production, capital investment, funds flow and free funds flow from 2025 to 2029; the allocation of cumulative free funds flow over 2025-2029 to shareholder returns and the balance sheet; the breakdown of 2025-2029 production and capital investment between the Montney/Duvernay and our conventional assets; the number of drilling locations and the breakdown by Montney and Duvernay and conventional assets and location type; that we have decades of top tier inventory in the Montney and Duvernay to support growth; the amount of inventory we consume in our 5 year plan; our forecasted average payout of our tier 1 and 2 inventory; the production profile of our Montney and Duvernay wells from 2024-2029, and the allocation by area thereof; the number of Montney and Duvernay wells to be drilled from 2024-2029, and the allocation by area thereof; the timing of our infrastructure buildout at Lator; that our asset base has upside potential; our forecast type curve parameters and economics; our forecasted 2H/24 production throughput at our Musreau Battery including the number of wells to come on production prior to year end; the number of future drilling locations identified at Lator; our belief that we can target multiple benches to enhance acreage recovery and productivity at Lator; our belief that we have over 25 years of stay-flat inventory at phase 1 capacity at Lator; our belief that we can increase facility capacity to 85,000 boe/d through an eventual second phase at Lator; our forecast production profile at Lator; the number of future drilling locations identified at Resthaven; our belief that we can enhance economic returns at Resthaven by capturing efficiencies and optimization from development on current focus areas; the capacity, liquids content, cost and timing of future infrastructure in the Montney and Duvernay; our belief that we will develop third-party partnerships to fund future strategic projects while retaining operatorship; our belief that our conventional assets are the foundation that supports our long-term sustainability; our forecasted year end 2024 and 5 year plan net debt values; our calculation of incremental funds flow realized upon capital efficiency improvements and operating cost reductions; that we will time our capital projects into long-term takeaway capacity; our belief that natural gas growth provides significant cash flow upside; our belief that our advantaged locations and firm service agreements ensure reliable pipeline egress for our entire portfolio; our 2029 crude oil financial exposure; our focus on price diversification across North America and globally through LNG exposure; that we have fractionation secured for our 5 year growth plans; our 2025 and target natural gas financial exposure; our forecast

for total CO<sub>2</sub> storage capacity and remaining injection life at the Weyburn Project; our belief that we are a leader in CO<sub>2</sub> sequestration; and the size of sequestration opportunity at each of our Saskatchewan, Lamont, Rolling Hills and Central Alberta Carbon Hubs.

Statements relating to "reserves" are also deemed to be forward-looking statements, as they involve the implied assessment, based on certain estimates and assumptions, that the reserves described exist in the quantities predicted or estimated and that the reserves can be profitably produced in the future. There are numerous uncertainties inherent in estimating quantities of proved and proved plus probable crude oil, natural gas and NGLs reserves and in projecting future rates of production and the timing of capital expenditures. The total amount or timing of actual future production may vary significantly from reserves and production estimates.

The forward-looking information is based on certain key expectations and assumptions made by our management, including: that we will continue to conduct our operations in a manner consistent with past operations except as specifically noted herein (and for greater certainty, the forward-looking information contained herein excludes the potential impact of any acquisitions or dispositions that we may complete in the future); the general continuance or improvement in current industry conditions; the continuance of existing (and in certain circumstances, the implementation of proposed) tax, royalty and regulatory regimes; expectations and assumptions concerning prevailing and forecast commodity prices, exchange rates, interest rates, inflation rates, applicable royalty rates and tax laws, including the assumptions specifically set forth herein; the ability of OPEC+ nations and other major producers of crude oil to adjust crude oil production levels and thereby manage world crude oil prices; the impact (and the duration thereof) of the ongoing military actions in the Middle East and between Russia and Ukraine and related sanctions on crude oil, NGLs and natural gas prices; the impact of rising and/or sustained high inflation rates and interest rates on the North American and world economies and the corresponding impact on our costs, our profitability, and on crude oil, NGLs and natural gas prices; future production rates and estimates of operating costs and development capital, including as specifically set forth herein; performance of existing and future wells; reserve volumes and net present values thereof; anticipated timing and results of capital expenditures / development capital, including as specifically set forth herein; the success obtained in drilling new wells; the sufficiency of budgeted capital expenditures in carrying out planned activities; the timing, location and extent of future drilling operations; the state of the economy and the exploration and production business; results of operations; performance; business prospects and opportunities; the availability and cost of financing, labour and services; future dividend levels and share repurchase levels; the impact of increasing competition; ability to efficiently integrate assets and employees acquired through acquisitions; ability to market oil and natural gas successfully; our ability to access capital and the cost and terms thereof; that we will not be forced to shut-in production due to weather events such as wildfires, floods or extreme hot or cold temperatures; and that we will be successful in defending against previously disclosed and ongoing reassessments received from the Canada Revenue Agency and assessments received from the Alberta Tax and Revenue Administration.

In addition, this presentation contains various assumptions regarding future commodity prices, exchange rates, capital expenditures, net debt levels, free cash flow levels and other matters that are located proximate to the aforementioned forward-looking information.

# ADVISORIES

## Special Note Regarding Forward-Looking Statements and Forward-Looking Information

Although we believe that the expectations and assumptions on which such forward-looking information is based are reasonable, undue reliance should not be placed on the forward-looking information because Whitecap can give no assurance that they will prove to be correct. Since forward-looking information addresses future events and conditions, by its very nature they involve inherent risks and uncertainties. These include, but are not limited to: the risk that the funds that we ultimately return to shareholders through dividends and/or share buybacks is less than currently anticipated and/or is delayed, whether due to the risks identified herein or otherwise; the risk that any of our material assumptions prove to be materially inaccurate, including our 2024 forecasts (including for commodity prices and exchange rates); the risks associated with the oil and gas industry in general such as operational risks in development, exploration and production including the risk that weather events such as wildfires, flooding, droughts or extreme hot or cold temperatures forces us to shut-in production or otherwise adversely affects our operations; pandemics and epidemics; delays or changes in plans with respect to exploration or development projects or capital expenditures; the uncertainty of estimates and projections relating to reserves, production, costs and expenses; risks associated with increasing costs, whether due to high inflation rates, high interest rates, supply chain disruptions or other factors; health, safety and environmental risks; commodity price and exchange rate fluctuations; interest rate fluctuations; inflation rate fluctuations; marketing and transportation; loss of markets; environmental risks; competition; incorrect assessment of the value of acquisitions; failure to complete or realize the anticipated benefits of acquisitions or dispositions; ability to access sufficient capital from internal and external sources on acceptable terms or at all; failure to obtain required regulatory and other approvals; reliance on third parties and pipeline systems; changes in legislation, including but not limited to tax laws, production curtailment, royalties and environmental regulations; the risk that we do not successfully defend against previously disclosed and ongoing reassessments received from the Canada Revenue Agency and assessments received from the Alberta Tax and Revenue Administration and are required to pay additional taxes, interest and penalties as a result; and the risk that the amount of future cash dividends paid by us and/or shares repurchased for cancellation by us, if any, will be subject to the discretion of our Board of Directors and may vary depending on a variety of factors and conditions existing from time to time, including, among other things, fluctuations in commodity prices, production levels, capital expenditure requirements, debt service requirements, operating costs, royalty burdens, foreign exchange rates, contractual restrictions contained in our debt agreements, and the satisfaction of the liquidity and solvency tests imposed by applicable corporate law for the declaration and payment of dividends and/or the repurchase of shares – depending on these and various other factors, many of which will be beyond our control, our dividend policy and/or share buyback policy and, as a result, future cash dividends and/or share buybacks, could be reduced or suspended entirely.

Our actual results, performance or achievement could differ materially from those expressed in, or implied by, the forward-looking information and, accordingly, no assurance can be given that any of the events anticipated by the forward-looking information will transpire or occur, or if any of them do so, what benefits that we will derive therefrom. Management has included the above summary of assumptions and risks related to forward-looking information provided in this presentation in order to provide security holders with a more complete perspective on our future operations and such information may not be appropriate for other purposes.

Readers are cautioned that the foregoing lists of factors are not exhaustive. Additional information on these and other factors that could affect our operations or financial results are included in reports on file with applicable securities regulatory authorities and may be accessed through the SEDAR+ website ([www.sedarplus.ca](http://www.sedarplus.ca)).

These forward-looking statements are made as of the date of this presentation and we disclaim any intent or obligation to update publicly any forward-looking information, whether as a result of new information, future events or results or otherwise, other than as required by applicable securities laws.

This presentation contains future-oriented financial information and financial outlook information (collectively, "FOFI") about our 2024 forecast capital spending (and allocation thereof), production volumes, funds flow, and free funds flow; the impact that the partial infrastructure monetization will have on our 2025 and 2025-2029 EBITDA and funds flow; our forecast for after tax proceeds from the partial infrastructure monetization; our 2025-2029 cumulative free funds flow and return of capital sensitivity at US\$65/bbl WTI, US\$75/bbl WTI and US\$85/bbl WTI; our forecast 2024 year end and 2029 net debt; our 2025-2029 cumulative free funds flow and the allocation to returns to shareholders and our balance sheet; our forecast for the cost of the Lator Phase 1 and Phase 2 facilities; our forecast for incremental free funds flow provided by 10% capital efficiency improvements and 5% operating cost reductions; our 2024 forecast capital spending split by Montney/Duvernay and conventional and certain details thereof; the single well economics of certain assets including drill, complete, equip and tie-in costs and NPV (10%) all of which are subject to the same assumptions, risk factors, limitations, and qualifications as set forth in the above slides. The actual results of operations of Whitecap and the resulting financial results will likely vary from the amounts set forth herein and such variation may be material. Whitecap and its management believe that the FOFI has been prepared on a reasonable basis, reflecting management's best estimates and judgments. However, because this information is subjective and subject to numerous risks, it should not be relied on as necessarily indicative of future results. Except as required by applicable securities laws, Whitecap undertakes no obligation to update such FOFI. FOFI contained in this presentation was made as of the date of this presentation and was provided for the purpose of providing further information about Whitecap's anticipated future business operations. Readers are cautioned that the FOFI contained in this presentation should not be used for purposes other than for which it is disclosed herein.

Additionally, readers are advised that historical results, growth, acquisitions and dispositions described in this presentation may not be reflective of future results, growth, acquisitions and dispositions with respect to Whitecap.

# ADVISORIES

The assumptions used for the 2024 forecast funds flow netbacks (\$/boe) used on slides 2, 4, 17 & 24 and for the 2025-2029 forecast funds flow netbacks (\$/boe) on slides 27 & 28 of this presentation are as follows (based on the mid-point where applicable). All other references to current, 2024 and/or 2025-2029 (5 Year Plan) forecast funds flow in this presentation utilize the same underlying assumptions/forecasts with the following being impacted by the various commodity price scenarios contemplated throughout this presentation: petroleum and natural gas revenues, realized hedging gains/losses, royalties and cash taxes.

	2024	2025-2029
WTI (US\$/bbl)	\$75.00	\$75.00
AECO (C\$/GJ)	\$1.50	\$3.00
Petroleum and natural gas revenues	\$58.25	\$57.00 - \$60.00
Tariffs	(\$0.50)	(\$0.50)
Processing income	\$0.75	\$0.75
Realized hedging gains (losses)	\$0.65	\$0.00
Royalties	(\$9.50)	(\$9.00) - (\$10.50)
Operating expenses	(\$14.35)	(\$13.50) - (\$14.50)
Transportation expenses	(\$2.10)	(\$2.00) - (\$2.20)
General and administrative expenses	(\$1.00)	(\$1.00)
Interest and financing expenses	(\$1.30)	(\$0.00) - (\$1.00)
Cash settled share awards	(\$0.50) - (\$0.60)	(\$0.25) - (\$0.50)
Cash taxes	(\$4.00) - (\$4.50)	(\$3.50) - (\$4.50)
Decommissioning liabilities	(\$0.65)	(\$0.50) - (\$0.75)

## Oil and Gas Advisory

### Reserves and Net Present Value

All reserve references in this press release are "Company share reserves". Company share reserves are our total working interest reserves before the deduction of any royalties and including any royalty interests payable to the Company.

It should not be assumed that the present worth of estimated future amounts presented represents the fair market value of the reserves. There is no assurance that the forecast prices and costs assumptions will be attained, and variances could be material. The recovery and reserve estimates of the crude oil, natural gas liquids and natural gas reserves provided herein are estimates only and there is no guarantee that the estimated reserves will be recovered. Actual crude oil, natural gas and natural gas liquids reserves may be greater than or less than the estimates provided herein.

### Barrel of Oil Equivalency

"Boe" means barrel of oil equivalent. All boe conversions in this press release are derived by converting gas to oil at the ratio of six thousand cubic feet ("Mcf") of natural gas to one barrel ("Bbl") of oil. Boe may be misleading, particularly if used in isolation. A Boe conversion rate of 1 Bbl : 6 Mcf is based on an energy equivalency conversion method primarily applicable at the burner tip and does not represent a value equivalency at the wellhead. Given that the value ratio of oil compared to natural gas based on currently prevailing prices is significantly different than the energy equivalency ratio of 1 Bbl : 6 Mcf, utilizing a conversion ratio of 1 Bbl : 6 Mcf may be misleading as an indication of value.

This presentation contains metrics commonly used in the oil and natural gas industry which have been prepared by management, such as "operating netback", "payout", and "profit to investment ratio". These terms do not have a standardized meaning and may not be comparable to similar measures presented by other companies, and therefore should not be used to make such comparisons.

"Payout" or "half-cycle payout" is calculated by the time period for the operating netback of a well to equate to the individual cost of the well. Management uses payout as a measure of capital efficiency of a well to make capital allocation decisions.

"Profit to investment ratio" is calculated by dividing the NPV of a well by the individual well cost. NPV is a supplementary financial measure. Management uses profit to investment ratio to make capital allocation decisions.

Management uses these oil and gas metrics for its own performance measurements and to provide shareholders with measures to compare our operations over time. Readers are cautioned that the information provided by these metrics, or that can be derived from the metrics presented in this press release, should not be relied upon for investment or other purposes.

# ADVISORIES

## Oil and Gas Metrics (cont'd)

### Drilling Locations

This presentation discloses drilling inventory in two categories: (i) booked locations (proved and probable); and (ii) unbooked locations. Booked locations represent the summation of proved and probable locations, which are derived from McDaniel's reserves evaluation effective December 31, 2023 and account for drilling locations that have associated proved and/or probable reserves, as applicable. Unbooked locations are internal estimates based on our prospective acreage and an assumption as to the number of wells that can be drilled per section based on industry practice and internal review. Unbooked locations do not have attributed reserves or resources.

The following table provides a detailed breakdown of the current Whitecap gross drilling locations included in this presentation:

	Total Drilling Inventory	Proved Locations	Probable Locations	Unbooked Locations
Conventional	3,980	1,318	201	2,461
Montney & Duvernay	2,462	262	118	2,082

### Production & Product Type Information

References to petroleum, crude oil , natural gas liquids ("NGLs"), natural gas and average daily production in this presentation refer to the light and medium crude oil, tight crude oil, conventional natural gas, shale gas and NGLs product types, as applicable, as defined in National Instrument 51-101 ("NI 51-101").

NI 51-101 includes condensate within the natural gas liquids ("NGLs") product type. The Company has disclosed condensate as combined with crude oil and separately from other natural gas liquids since the price of condensate as compared to other natural gas liquids is currently significantly higher and the Company believes that this crude oil and condensate presentation provides a more accurate description of its operations and results therefrom. Crude oil therefore refers to light oil, medium oil, tight oil and condensate. NGLs refers to ethane, propane, butane and pentane combined. Natural gas refers to conventional natural gas and shale gas combined.

The Company's average production disclosed in this presentation consist of the following product types, as defined in NI 51-101 and using a conversion ratio of 1 Bbl : 6 Mcf where applicable:

	Light and Medium Oil (bbls/d)	Tight Oil / Condensate (bbls/d)	NGLs (bbls/d)	Shale Gas (Mcf/d)	Conventional Natural Gas (Mcf/d)	Total (boe/d)
2024	75,200	14,800	18,000	220,000	149,000	169,500

# ADVISORIES

## *Specified Financial Measures*

This presentation includes various specified financial measures, including non-GAAP financial measures, non-GAAP ratios, capital management measures and supplementary financial measures as further described herein. These financial measures are not standardized financial measures under International Financial Reporting Standards ("IFRS Accounting Standards" or, alternatively, "GAAP") and, therefore, may not be comparable with the calculation of similar financial measures disclosed by other companies.

"EBITDA" is a non-GAAP financial measure. The most directly comparable financial measure that is disclosed in our financial statements is net income. EBITDA is calculated as earnings before interest, taxes, depreciation and amortization, and is adjusted for non-cash items, transaction costs and extraordinary and non-recurring items such as material acquisitions or dispositions. Management uses EBITDA to compare principal business activities across historical periods to future financial forecasts and in assessment of our historical and future financial leverage. Whitecap's EBITDA for the year ended December 31, 2023 was \$2.0 billion.

"Enterprise value" is a supplementary financial measure and is calculated as market capitalization plus net debt. Management believes that enterprise value provides a useful measure of the market value of Whitecap's debt and equity.

"Free funds flow" is a non-GAAP financial measure calculated as funds flow less expenditures on property, plant and equipment ("PP&E"). Management believes that free funds flow provides a useful measure of Whitecap's ability to increase returns to shareholders and to grow the Company's business. Free funds flow is not a standardized financial measure under IFRS Accounting Standards and, therefore, may not be comparable with the calculation of similar financial measures disclosed by other entities. The most directly comparable financial measure to free funds flow disclosed in the Company's primary financial statements is cash flow from operating activities. Refer to the "Cash Flow from Operating Activities, Funds Flow and Payout Ratios" section of our management's discussion and analysis for the three and six months ended June 30, 2024 which is incorporated herein by reference, and available on SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca).

"Funds flow", "funds flow basic (\$/share)" and "funds flow diluted (\$/share)" are capital management measures and are key measures of operating performance as they demonstrate Whitecap's ability to generate the cash necessary to pay dividends, repay debt, make capital investments, and/or to repurchase common shares under the Company's normal course issuer bid. Management believes that by excluding the temporary impact of changes in non-cash operating working capital, funds flow, funds flow basic (\$/share) and funds flow diluted (\$/share) provide useful measures of Whitecap's ability to generate cash that are not subject to short-term movements in non-cash operating working capital. Whitecap reports funds flow in total and on a per share basis (basic and diluted), which is calculated by dividing funds flow by the weighted average number of basic shares and weighted average number of diluted shares outstanding for the relevant period. See Note 5(e)(ii) "Capital Management – Funds Flow" in the Company's unaudited interim consolidated financial statements for the three and six months ended June 30, 2024 for additional disclosures.

"Maintenance capital" is a non-GAAP financial measure calculated as the required annual expenditures on PP&E to keep production flat. Management believes that maintenance capital provides a useful measure of the required cash outflow that would maintain the same level of potential earnings.

"Market capitalization" is a supplementary financial measure and is calculated as period end share price multiplied by the number of shares outstanding at the end of the period. Management believes that market capitalization provides a useful measure of the market value of Whitecap's equity.

"Net Debt" is a capital management measure that management considers to be key to assessing the Company's liquidity. See Note 5(e)(i) "Capital Management – Net Debt and Total Capitalization" Company's unaudited interim consolidated financial statements for the three and six months ended June 30, 2024 for additional disclosures, which are incorporated herein by reference, and available on SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca).

"Operating Netback" is a non-GAAP financial measure determined by adding marketing revenues and processing & other income, deducting realized losses on commodity risk management contracts or adding realized gains on commodity risk management contracts and deducting tariffs, royalties, operating expenses, transportation expenses and marketing expenses from petroleum and natural gas revenues. The most directly comparable financial measure to operating netback disclosed in the Company's primary financial statements is petroleum and natural gas sales. Operating netback is a measure used in operational and capital allocation decisions. Operating netback is not a standardized financial measure under IFRS Accounting Standards and, therefore, may not be comparable with the calculation of similar financial measures disclosed by other entities. For further information, refer to the "Operating Netbacks" section of our management's discussion and analysis for the three and six months ended June 30, 2024, which is incorporated herein by reference, and available on SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca).

"Per boe" or "\$/boe" disclosures for petroleum and natural gas sales, royalties, operating expenses, transportation expenses and marketing expenses are supplementary financial measures that are calculated by dividing each of these respective GAAP measures by the Company's total production volumes for the period.

"Production per share" is the Company's total crude oil, NGL and natural gas production volumes for the applicable period divided by the weighted average number of diluted shares outstanding for the applicable period.

See press release dated July 24, 2024, as well the related sections in our management's discussion and analysis, and our unaudited interim consolidated financial statements for the three and six months ended June 30, 2024, which are incorporated herein by reference, and available on SEDAR+ at [www.sedarplus.ca](http://www.sedarplus.ca) for free funds flow, net debt and operating netback reconciliation tables.
